Sustainability icon: Avector @istockphoto.com

It all starts with awareness!

Image source: blogs.iu.edu

Shared Responsibility Model

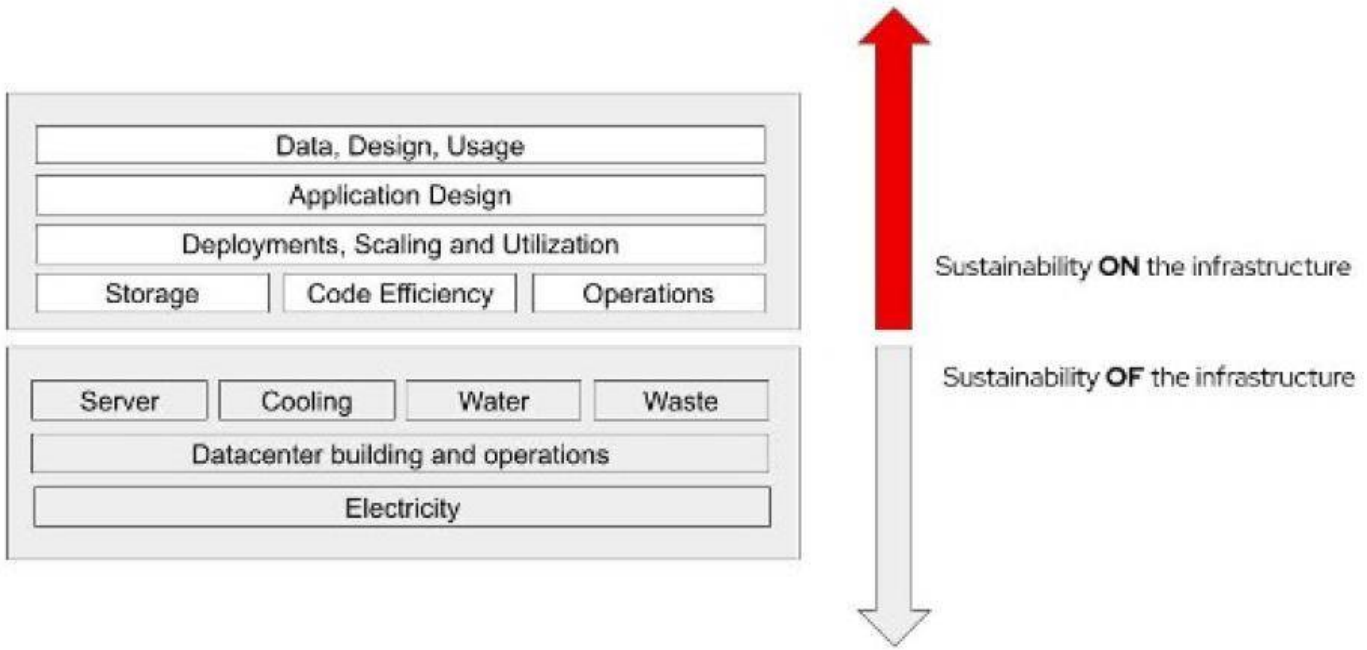

Image source:
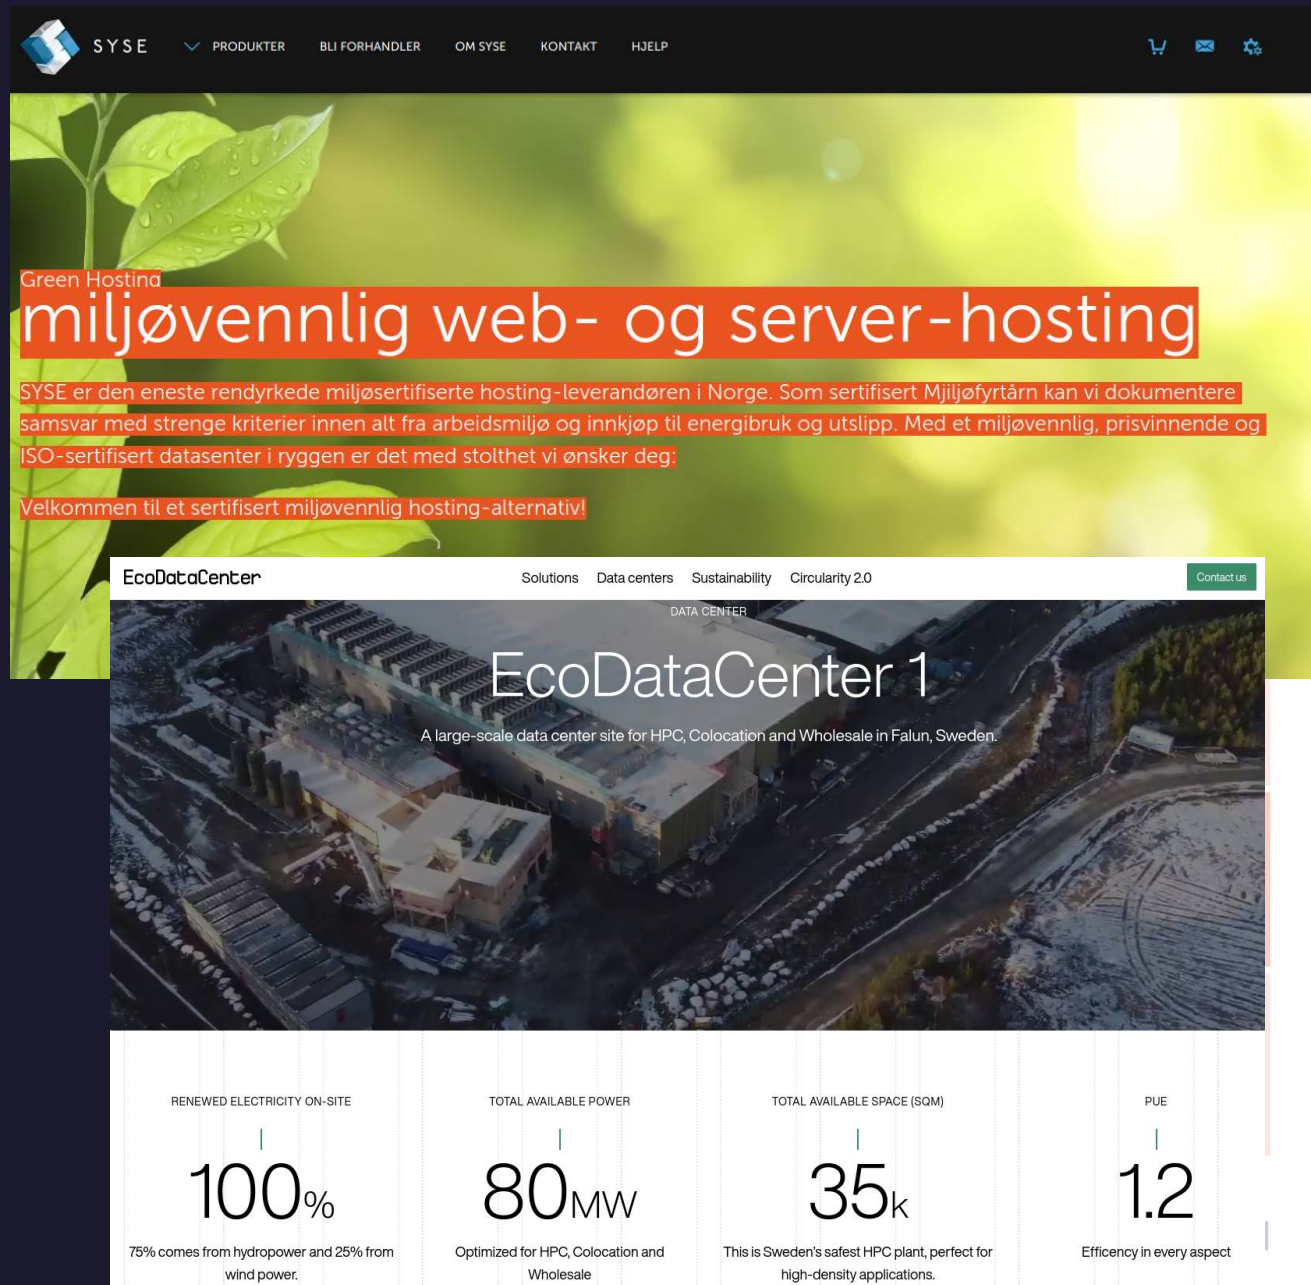
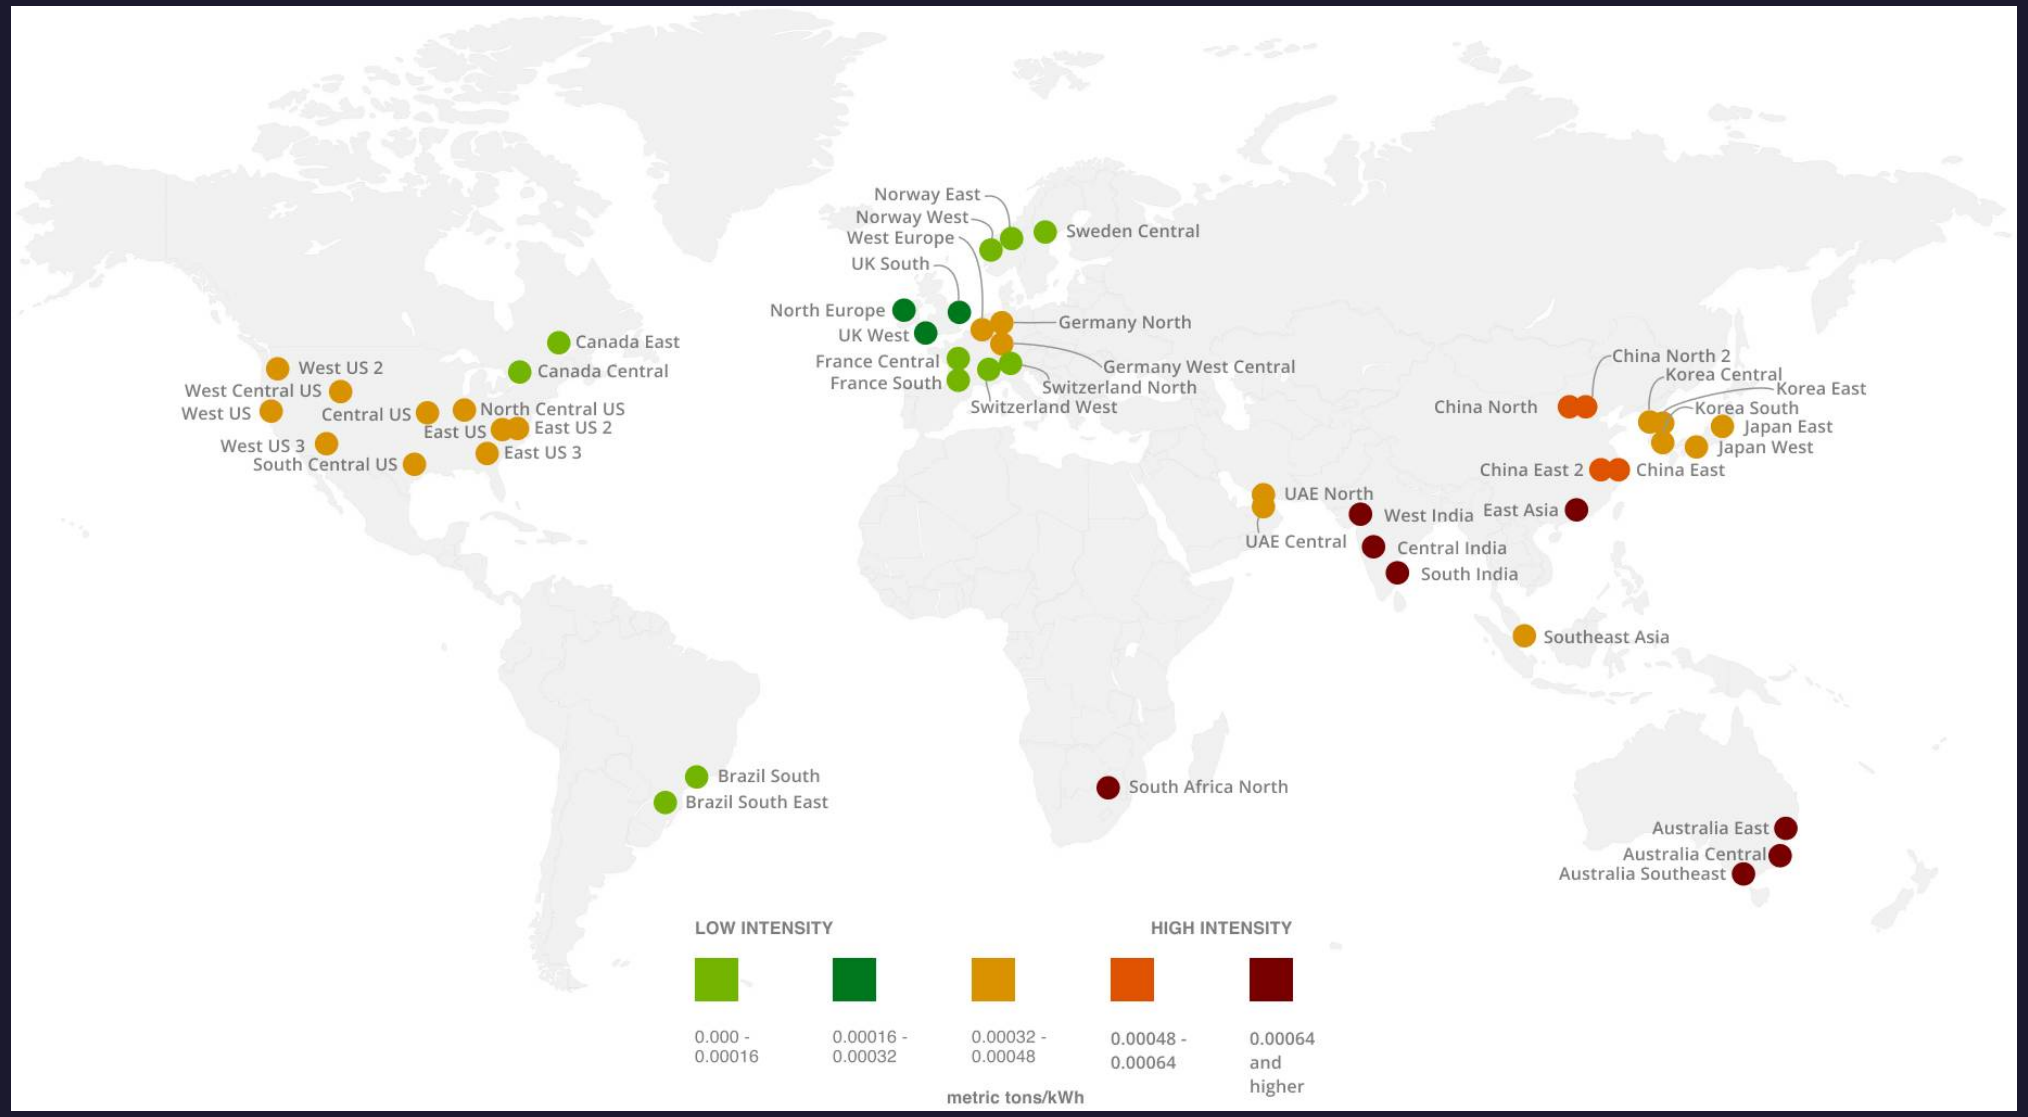
https://www.redhat.com/architect/sustainable-software-architecture

Supply chain && Location

- Data center type
- Energy source and efficiency
- Overall strategy and commitments
- Carbon offsetting/Greenwashing
- Region
  - Heat map
  - Consumer proximity



Supply chain && Location



Node type && size

- VM type and size
  - VM series
  - Power-efficient processors (Ampere Altra Arm-based)
  - Oversizing ⚠️
- Spot instances
- Proximity placement group

Fewer compute resources + highest utilization = 

Hearts image source: Mariia Shapilova @Dreamstime.com

Scaling

- Conscious scaling
- Sudden bursts vs. constant load
- Automatic vs. manual scaling
- Event-driven scaling

Emerging: Carbon-aware scaling

KEDA

KEPLER

Karpenter

Eliminate zombies!

- Regular "Dugnad" :)
- Scale to zero
- Turn off policy
- On-demand usage
- Scheduling time frame
- Detect and alert upon "zombie"

Image source: blog.cat-gifs.com
And my animation designer skills :)

Applications

Lift and shift ≠ sustainable (by default)

- Application architecture
- CI/CD
- Deployment model
- Observability
- Best practices
  - Containerized applications
  - Green coding/Green software engineering
  - Lean coding

Cloud Carbon Footprint

RECOMMENDATIONS

Cloud Providers: 1 of 3 | Accounts: 1 of 3 | Services: 26 of 26 | Start Date → End Date | 1M | 3M | 6M | 12M | ALL

Your cumulative emissions are

5.9 metric tons CO2e

that is equivalent to

CO2e emissions from

7

direct one way flights from NYC to London

FLIGHTS | PHONES | TREES

Source: Flight Carbon Footprint Calculator

Savings

Estimated monthly savings available

US$2,336.45

Right-size your cluster nodes

Adjust the number and size of your cluster's nodes to stop over-spending on unused capacity.

Kubernetes Insight

Save up to
US$2,452.21 /mo

Remedy abandoned workloads

Scale down, delete or resize pods that don't send or receive a meaningful rate of network traffic.

Kubernetes Insight

Save up to
US$182.95 /mo

Manage unclaimed volumes

Delete volumes that are unused by any pods or move them to a cheaper storage tier.

Kubernetes Insight

Explore savings

Manage underutilized nodes

Turn down or resize nodes with low memory and CPU utilization.

Kubernetes Insight

Save up to
US$934.67 /mo

Nodes with underutilized CPU & memory

Nodes with low memory and CPU utilization are candidates for being turned down or resized. The following nodes have sustained usage below 25% in both categories. Your cluster has enough resource availability to support turning these nodes down.

Maximum CPU/RAM Request Utilization (60%)

Node	Node Checks	Pod Checks	Recommendation
akswinpol00003o	Passed	Passed	Safe to drain. Save $246.87 / mo.
